

Gone Green!

Promoting the health of our Earth has become an important part of daily life. At Cadillac Family Dental we are concerned about how our lives affect the future of the planet, and we have “Gone Green”! A few of the actions we are taking include recycling everything possible, using fluorescent bulbs instead of incandescent, working in an efficiently insulated building to keep propane and electric use down, using programmed thermostats, never placing a mercury (silver) filling, and joining Sky Blue Electric, an environmental group that has certified us Green by EPA standards. The benefits of this group go towards removing carbon from the atmosphere. We are passionate about leaving behind a healthy world for generations to come, and hope everyone does what they can to make a difference!
