

Patient Comforts

In the past years, we have noticed that many patients have dental fears. We want to welcome you to Cadillac Family Dental where we put our patient's needs first. We do our best to keep all of our patients as comfortable as possible. We have a very warm office and team where we always look out for the best interests, and comforts, of our patients. We have many ways to help make your experience here as enjoyable as possible.

We have many comforts to help you relax no matter what your age may be. We have warm blankets, head phones with a variety of songs, and feel free to bring your CD or I-pod, as we can accommodate that as well. We also offer warm neck rolls, Nitrous Oxide, and sedation that you can take before your appointment to make you feel more comfortable. Furthermore, please feel free to ask what else we can do to make your experience more pleasurable.

Please come in for a consultation to see our office and meet our team.
